

**Troll's Knoll Park
COMMUNITY MEETING #2 NOTES**

Wednesday, July 16, 2014, 6:30p – 7:45p
Fremont Abbey Arts Center
4272 Fremont Ave N., Seattle, WA 98103

This is the second and final meeting for the 2008 Parks and Green Spaces Levy Opportunity Fund project at Troll's Knoll Park. Parks staff, Department of Neighborhoods P-Patch Program staff and Design Consultant presented the schematic design for the renovation project. Community attendees were interacting with staff during the presentation on questions and comments. Parks will compile all input from the community to modify the preferred schematic design for the newly developed park. The project will now move into design development with the intention to begin construction in early Spring 2015.

Troll's Knoll Park | 2nd Public Meeting Notes

1. P-Patch Area

- Need clearer definition between P-Patch area and the public space.
- Possibly saving the existing fruit trees on site near the P-Patch area.
- How can the gathering space become more inclusive for everyone other than just the p-patchers.
- Instead of 10x10 square feet, plots could be shaped in more rectangular form for easier access.
- Test soil for P-Patch – pollution from the busy road.

2. Lower Gathering Plaza

- Possibly having solar powered trash receptacles near the Troll to address littering from visitors.

3. Lighting

- Prefer light bollards for the path instead of light poles.
- 15 ft o.c seems to be very dense.

4. East Side

- Create a natural habitat area for the birds
- One community member provided information that there are many birds that use the east side.
- Need irrigation or watering strategy for the new planting

5. Open Lawn

- Add trees to the west to provide shade

6. Wind Turbines

- Can the power feed back into the grid
- Relocate the turbines for maximize wind speed
- Possibly need a structure or box above/underground for the batteries
